Company Profile

Welcome

To Our Next Gen Tech Industry

We help professionals from all over the world creating compelling spaces with light.

Since 1925, we've been a symbol of excellence in Sports, Arena & Stadium Lighting, media façade, upscale urban lighting and street furniture worldwide.

With our customer-centric, we quickly respond to customer needs. Providing effective services to our customers is the principle for our work direction and value creation. Customer demand is the driving force for our development.

About Us

Fully equipped with professional team and modern facilities to manufacture fine next generation LED products, we make products that have found wide application in airports, stadiums, stations, ports, gymnasiums, universities, colleges, public infra, etc.

Our LED products are deployed across 97 countries all over world, covering Asia, Middle East, America, Europe and Africa.

From stadium to TV station to conference & events, La Martini provides a wide range of eye-catching and energy efficient LED solutions to industrial, commercial and governmental markets worldwide

Company Profile

Factory Production lines

High-speed chip Mounting machine

Lead-free 3nitrogen wave soldering machine

Lead-free reflow machine

Ingress Protection Testing

Unit modules aging furnace

Auto-crystal machine

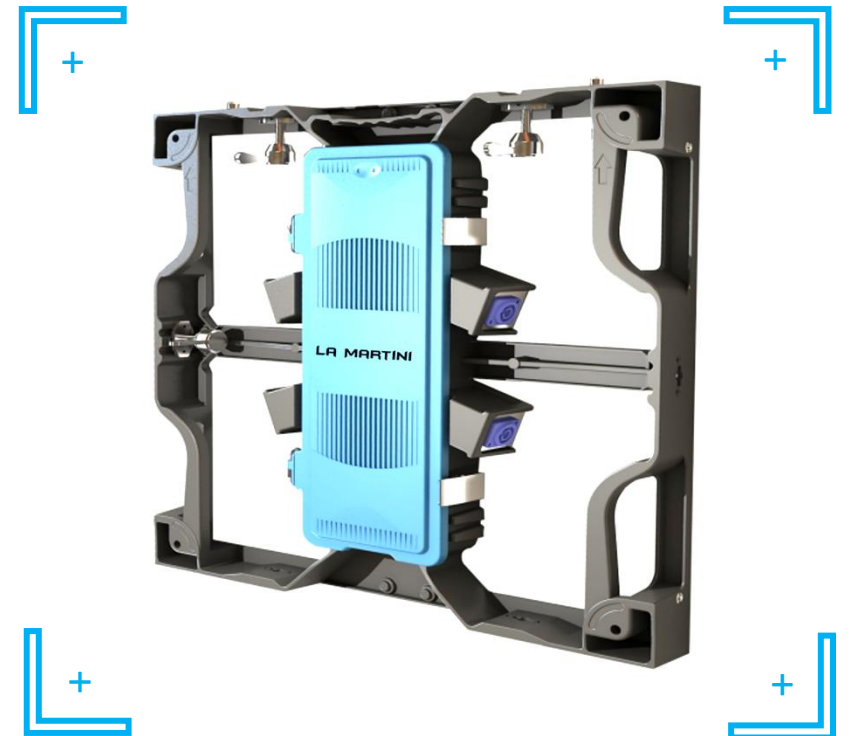

Automatic irrigation plastic machine

Assembly and manufacture line

Module Production Procedure

1. The PCB board printed solder paste
2. Stick Horn and the power set
3. Stick capacitance, resistance and integrated circuit
4. Stick SMD lamp
5. High temperature wilding
6. Print painting to prevent franklinism, water and dust
7. Attach back shell
8. Gluing
9. Attach mask
10. White balance test and aging test for 72 hours

Company Culture

Company purpose

Quality first, integrity-based

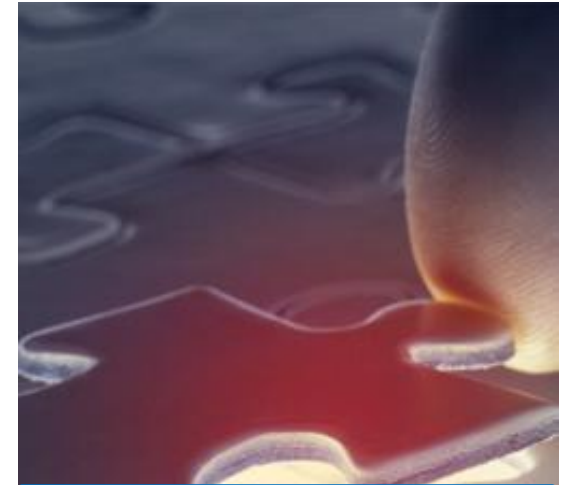

Service philosophy

Customer first, service attentively

Business philosophy

Scientific and integrity management

Enterprise spirit

Pragmatic, innovative and united

Product introduction

Product Categories

Special

Special LED Display

such as VDO mesh display ,
transparent display, truck
display and Arc led display

Rental

Rental LED Display

dedicated for rental use, die-
casting aluminum material,
light weight, fast installation.

**Small
Pixel**

Hi-tech Narrow
Pixel Pitch Series

UHD display effect, high
refresh rate and high contrast
ratio

Fixed

Fixed LED Display

dedicated for indoor and
outdoor use, high brightness
and stunning contrast.

Hi-tech Narrow Pixel Pitch Led Display

P1.25, P1.56, P1.667, P1.875, P1.923, P2, P2.5

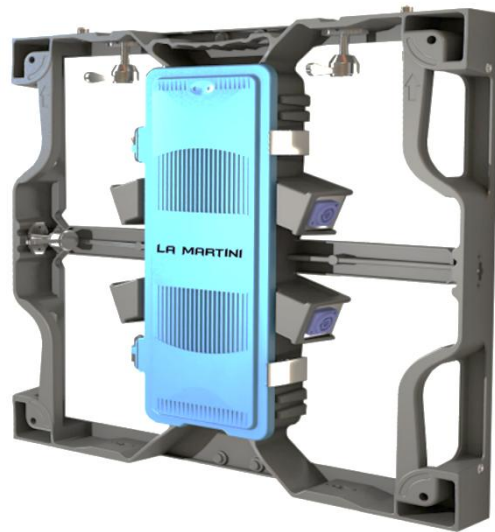

- High Refresh Rate
- Middle Brightness And High Gray-scale
- Vivid Video Quality
- Seamless Splicing

Rental Series – Indoor & Outdoor Die Cast Aluminum

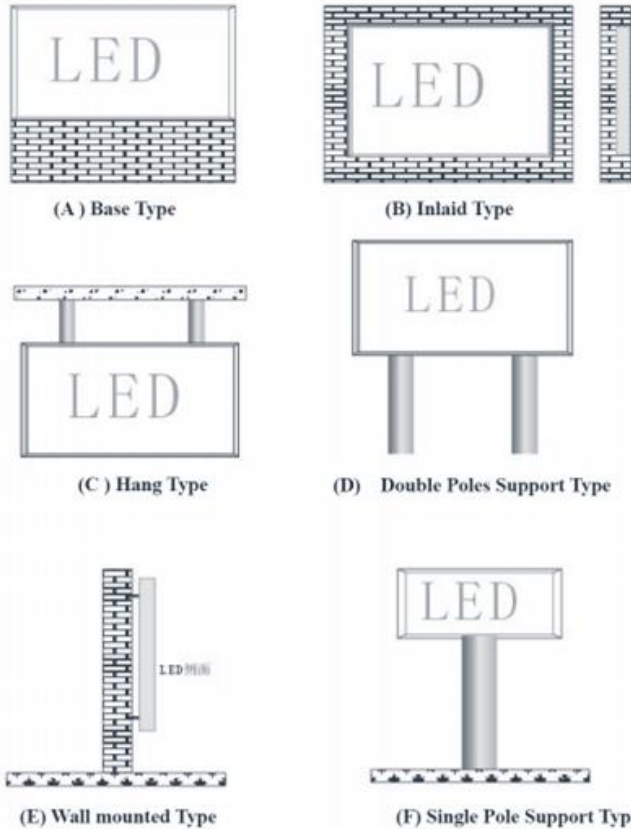

- ★ Light weight
- ★ Good Heat Dissipation
- ★ Low Power Consumption
- ★ Convenient Installation
- ★ Easy Move

Fixed Series - Indoor & Outdoor Metallic Enclosure

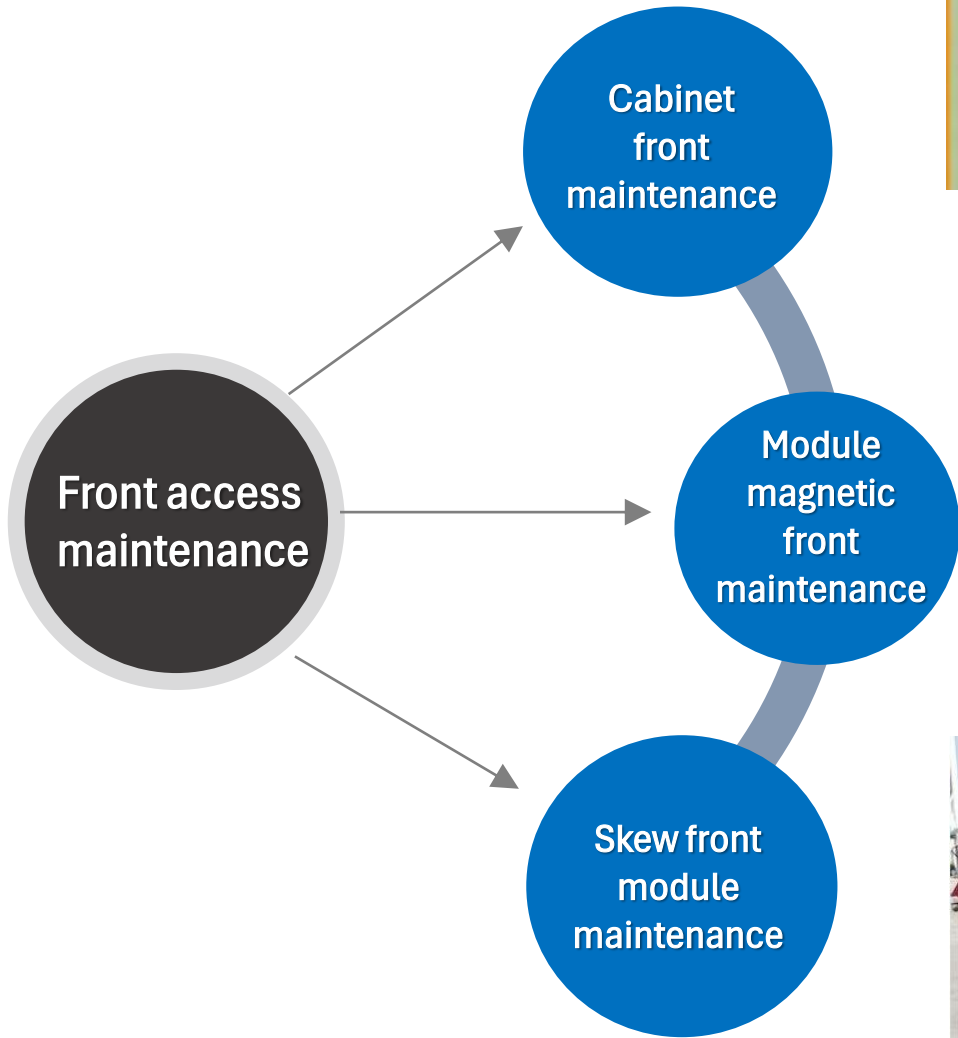

Installation Type Example

Above six installation types are most common for outdoor LED display. Base, Inlaid, Hang, Double Poles Support are most common for indoor LED display.

The main characters of this kind of display are:

- Easy installation and light weight can make it amount in the wall or lift against the wall.
- Front access design allows to make thicker LED display, which is suitable for some special locations where there is no more space for rear maintenance.
- Cabinet front service type is suitable for small size screen while module front service type is suitable for any size

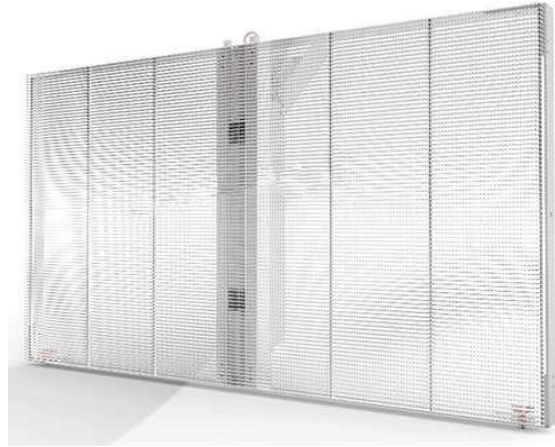

Mesh Curtain Led Display

The bar-shaped special full color LED display belonged to the group of display for both outdoor and indoor use is mainly applicable to the outdoor extremely large live LED display project.

The outlet cable of module is made of silicone material with supreme high temperature resistant performance and matched with specialized waterproof connector. The specialized wholly-sealed waterproof structure of modules can make the display reach IP65.

Transparent LED
Display
(for glass wall advertising)

LED Truck Series
(for moving advertising)

1. Anti-wind jack
2. Cables with air plug
3. Hydraulic pressure controller
4. Audio device

Arc LED Display

Dance Floor LED Display

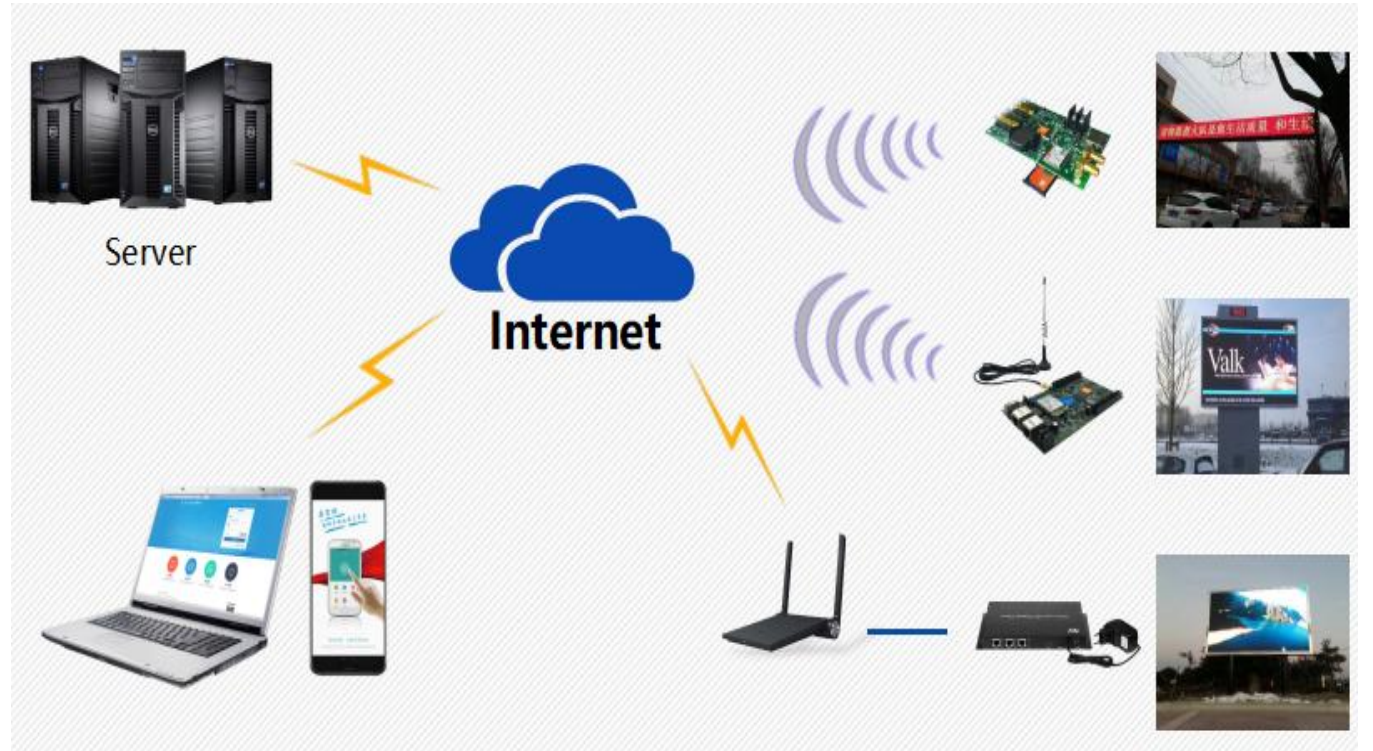

Perimeter LED Display

Advertising LED Display

Street light pole led screen

Service

Our Products Applications

Club, stadium area, cultural squares, commercial streets, entertainment area, arts stage, exhibition centers, urban landscaping, enterprises and institutions, administrative and other fields.

Service goal: Fast, In time, Customer first

- 7/24 hours service
- Maintain and repair. Respond in time (within 4 hours). Repair within 24 hours for common failure, 72 hours for sever failure. Maintain regularly.
- Provide spare parts and technical tolls for long-term.
- Technology support for important action and programs.
- Free system upgrade.
- Free training.

Our Service

- Project consultation
- Structure construction suggestion
- On-site installation assistant
- Engineer regular operation training

Our Guarantee

- All products are rigorously tested before shipping
- Warranty: We offer 2-5 years Warranty period as per product selection.

Our Vision

- Be the trendsetting Professional Lighting Solution
- Be a leading global LED product manufacturing base
- Be an integrated LED product expert of designing, researching, developing, Manufacturing & Maintaining.

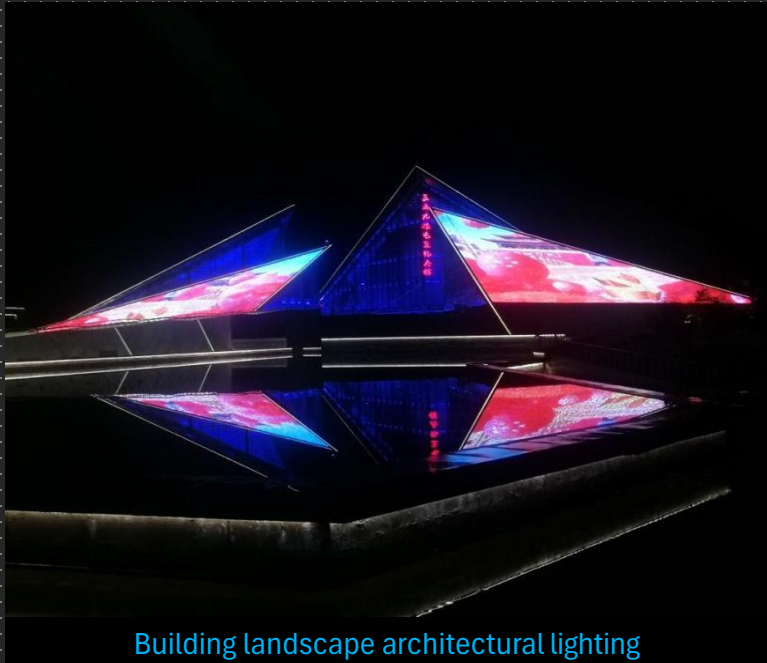

La Martini
Future of Illumination is Here

LM : LVDO,

MEDIA FAÇADE LIGHTING,
POINT LIGHT & GRID SCREEN

- Outdoor creative visual display solution

Application - Irregular building facade

Building landscape architectural lighting

Venue facade lighting

Featured landmark buildings

Creative canopy

Bridge lighting

Commercial complex media facade

Creative styling design, presenting diverse images

Line application

Point application

Surface application

Point light sources can range from point to line, line to surface, achieve different effects

Dots: used for embellishment, starry sky twinkling effect, usually with large pixel pitch.

Line: used to create outlines & line effects, and create lighting effects, such as flowing water & chasing.

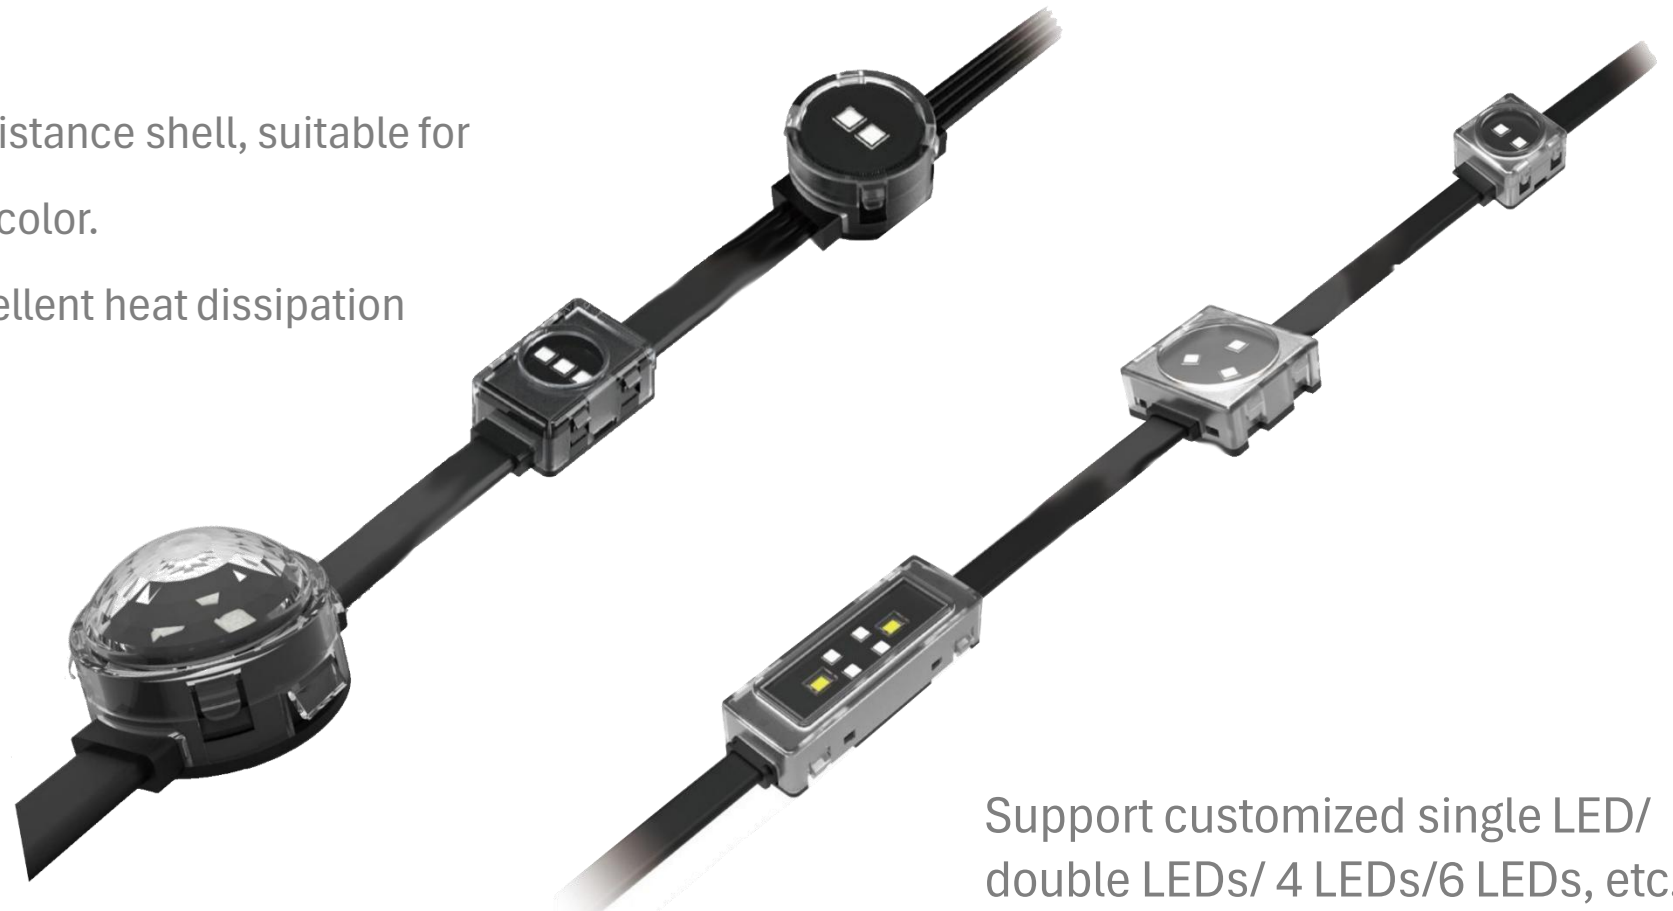

Surface Application : used for display advertising & other effects, similar to display screen, with a relatively small pitch.

Various product range, adaptable to various scenarios

Die-casting + PC material

Cost-effective product:

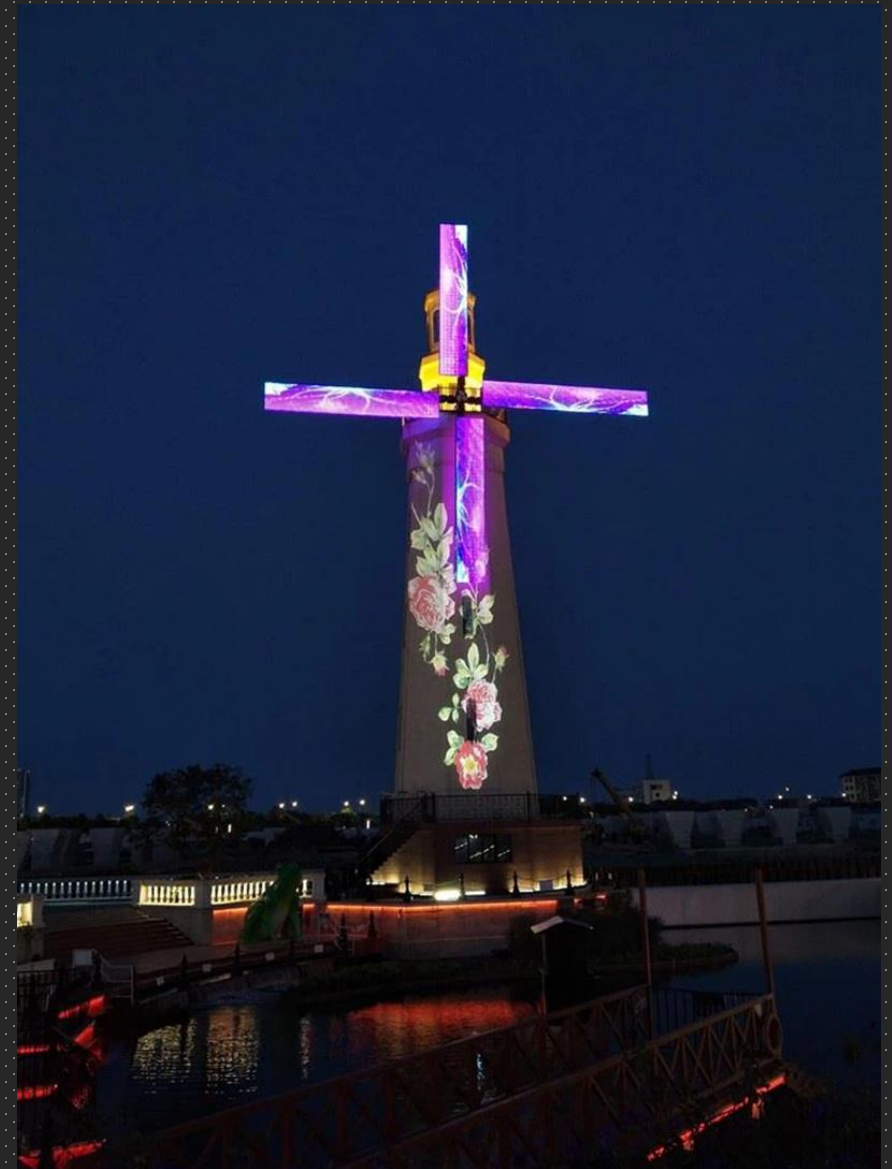

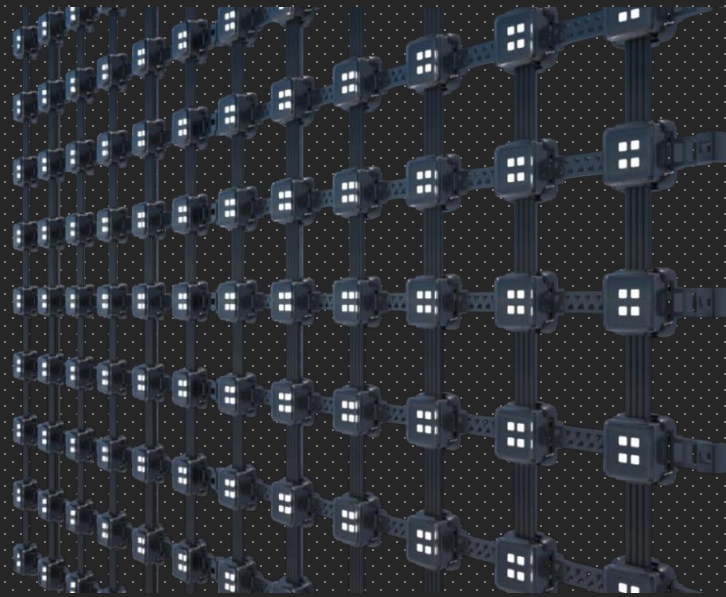

- flame retardant 94-V0 & UV resistance shell, suitable for outdoor for 5-years without discolor.
- High mechanical strength, excellent heat dissipation coefficient

Support customized single LED/
double LEDs/ 4 LEDs/6 LEDs, etc.

Ultra-high permeability, light & flexible design

- Hollow surface design application, highest permeability could reach $\geq 90\%$;
- High wind resistance, effectively reduce wind load, adapt to most outdoor scenes;
- Light & soft screen, can be curled and folded at will, perfectly integrated with building façade;
- Supports custom designed per project area & viewing distance, various VDO pitch to meet different demand.

Low carbon energy saving, reduce operating costs

Under the same area and brightness, the power consumption is only 30% of the conventional outdoor display, low carbon energy saving, reduce customer operating costs.

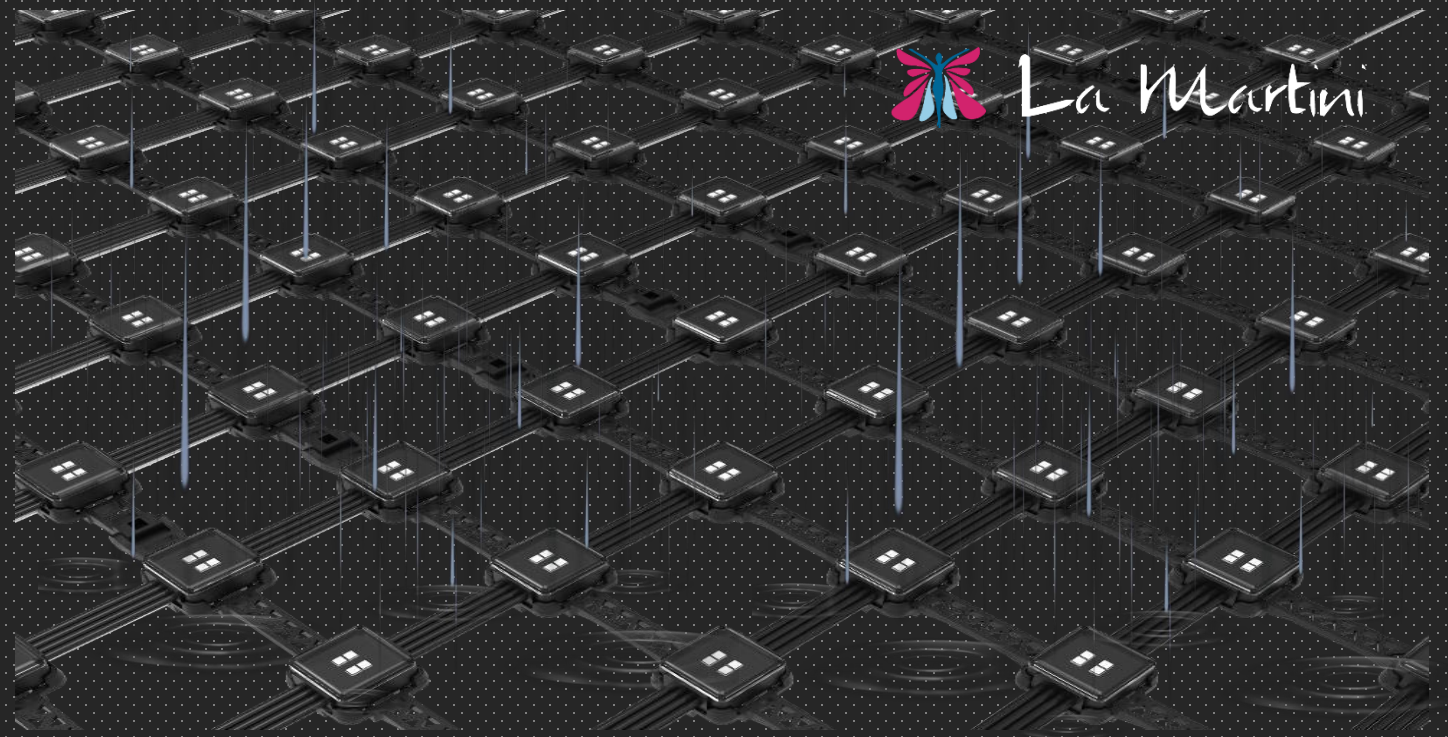

Standardization Fool-proofing Design

Special male & female wiring, standardized components,
IP67 standard waterproof navigation plug, easy for operation and
maintenance.

All weather IP67, worry-free protection for outdoor use

Adopt customized glue filling process, protection grade IP67, anti-heavy rain, anti-salt spray, anti-dust, anti-pollution, anti-strong storm, anti-UV, long service life, suitable for long-term outdoor use.

Parameter

Parameter	LM : LVDO31.25	LM : LVDO40	LM : LVDO50	LM : LVDO55	LM : LVDO80	LM : LVDO100	LM : LVDO150
VDO Pitch (mm)	31.25	40	50	55	80	100	150
VDO Density (dots/m ²)	1024	625	400	324	144	100	36
Brightness	40-9000nits						
Transparency	43%	60%	70%	74.5%	85%	87%	93%
Material	PC/ Die-casting Aluminium						
Module / Cabinet Size	Customization						
Maintenance	Front Maintenance						
Viewing Angel(°)	110°±10%						
Gray Scale(bit)	16						
Protection Grade	IP67						
Peak Power Consumption	0.5~1.4W/dot						
Life Time	≥100,000H						

Parameters take 4 LEDs point light sources as an example, for reference only, the specific value depends on the project.

World leader in
Media Façade &
Professional Displays

Game meet **changer**

Cabinet-free. Ultra-lightweight.
Any shape you want.
